ICYMI:

Biden Administration Hits the Road to Show How Bipartisan Infrastructure Law Will Change Lives

Today, President Biden visited a bridge needing major repairs in New Hampshire to kick off an administration-wide effort where the President, Vice President, and Cabinet Members will travel across the country speaking directly with Americans about how the Bipartisan Infrastructure Law will change their lives for the better.

Officials will travel to red states, blue states, big cities, small towns, rural areas, Tribal communities, and more to highlight how the law will create good-paying, union jobs and what the law means in tangible terms: rebuilding roads and bridges, modernizing public transit, expanding access to clean drinking water, ensuring every American has high-speed internet, building a national network of EV charging stations, and more.

See below for more on where the Biden Administration is headed this week:
